

“Exhibit IdeasTrain seating area” Experience public transport

The seating area makes public transport at DB tangible.

Based on our successfully operating innovation projects ‘Ideen zug Südostbayernbahn’ and ‘Ideen zug Taunusstrecke’, we have presented the group travel area as a tangible piece of seating furniture.

Here you can not only experience the unique design and material world of the new regional interiors, but also immerse yourself in the world of public rail and road transport through our information film “ÖPNV at DB” and experience the services, innovations and products that DB has to offer.
