

Supplier Management

Information for Suppliers

2026 | Berlin

Integrated, strategic supplier management will create tangible benefits for suppliers and DB

DB Supplier & Procurement Interaction

Security of supply

An **efficient, innovative** and **transparent supplier base** will enable a **high-performance supply chain**

Transparency

Internal and external **data transparency** will enable proactive risk **management** and target-oriented **communication**

Relationship management

Establishing a strong **cooperation model** and **relationship management** between procurement, internal customers and suppliers.

Cost stability

Avoiding additional costs and **raising supplier performance** in terms of non-monetary value drivers

Innovation/competitiveness

Early **identification of new potential suppliers** and value-adding **innovations**

Our Supplier Portal provides essential information, the latest procurement updates, and guides you intuitively through the registration process.

Use our **Supplier Portal** to:

- Learn about DB's **procurement priorities**
- Understand **qualification requirements**
- Download relevant **documents**
- Access relevant **IT tools**
