Brake Tester Pdr 5

So that you arrive safely.

This brake test unit enables testing in compliance with UIC 540, guideline 900.0080 and VPI_07.

- The Pdr unit can be used in the upper or lower position.
- This optional unit can be used to check automatic load-proportional braking on a single vehicle (in the case of bogie wagons, both bogies simultaneously).
- Modification by means of the portable RailTab offers a high level of user friendliness while minimising data entry thanks to the following functions, among others:
 - Visualisation of brake test sheets
 - Digital documentation and archiving of brake test sequences
 - Optional: brake force measurement with one or two force sensors
 - Pressure graphs can be exported directly as a PDF file.
 - The tablet does not require a cable (Wi-Fi) and can be detached.
 - Optional rechargeable battery operation for network-independent use
