

WHIS[®]damper

Effective vibration damping system for steel bridges

Simulation:

- Calculation of noise reduction based on the position, number, and thickness of the panels

No closure periods:

- Installation under the bridge during ongoing traffic

Installation:

- Magnetic attachment
- No drilling or screwing

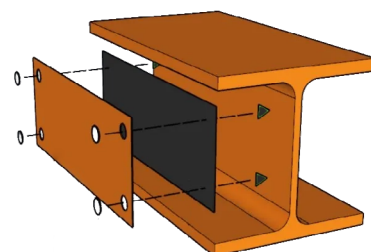

Application Areas:

- Railway bridges
- Highway bridges

Technical Specifications:

- Noise reduction: approx. 9 dB
- 2-layer coated, weather-resistant steel
- Project-specific determination of dimensions and weight
- Available in different colors

In cooperation with

reducing
traffic
noise
