

Passenger Information
DB Info

Guidance for passengers. Valuable data for the industry.

DB Information's reliable support is now available digitally, even at smaller stations where there is no on-site customer service.

At a Glance:

- **Neutral and operator-independent information:** The trusted DB Information service, which passengers are familiar with at railway stations, is expanding into the digital space. A dedicated website and mobile app are launching under the "DB Info" brand.

- **Focus on real-time information and accessibility:** Reliable, neutral, and seamless travel information throughout the entire passenger journey.

- **Expanding data availability:** The infrastructure data used by DB Info is published transparently via the rail industry's established data platforms. #Mobilithek #OpenStation API

- **Improving data quality:** The functionality of the customer-facing platform is continuously expanded to collect additional data points, enabling the systematic measurement and ongoing improvement of data quality.
