

Passenger Information Replacement Bus Services

Clear guidance. Reliable information during corridor renovations.

High-capacity replacement bus services ensure passenger mobility during corridor renovations. Consistent passenger information and a comprehensive communication approach provide clear guidance and transparency throughout the entire journey.

At a Glance:

- **Consistent passenger information**, including timetables, real-time data, live maps, and stop information, ensures transparency across all channels.
- **Comprehensive communications** support passengers before, during, and after corridor renovations through a dedicated website, social media, FAQs, promotional activities, and digital and on-site information services.
- **The distinctive purple colour scheme** helps passengers find their way and intuitively guides passengers from the station to the bus, back to rail services, or directly to their destination.
