# Colibri

Digital products in your rail vehicle

DB Fahrzeuginstandhaltung GmbH | InnoTrans 2024

The digital train

**Colibri – Co**ach **Li**nk for **Br**oadband **I**nformation Exchange

One step smarter with every module.

- Non-proprietary IT platform for business and passenger applications

- Hardware and software

- Integration in new vehicles

- Support during conversion

- From prototype to fleet production

- Various options for integrating third-party providers

Our IT platform for you

Colibri

State-of-the-art hardware and software

Hardware:

- Our state-of-the-art hardware architecture is continually being updated.
- New technologies are tested in the in-house innovation lab and integrated into the system following acceptance.

Software:

- Regular remote updates ensure optimum performance and maintain the necessary levels of IT-security.

Our broad service portfolio in a nutshell
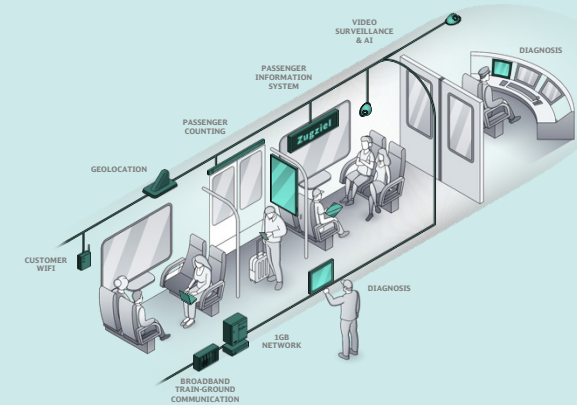

DB

Installation space inspection using 3D scanning	Engineering & production planning and control	Kit manufacture & installation	Use cases

COLIBRI KIT

BOX I   BOX II   BOX III

- Inspection of available installation spaces
- Integration planning
- Visualisation using 3D scan data
- Cost estimation & bid preparation

- Concept development for integrating existing or third-party systems
- Design and installation
- Manufacturing documents for kit production
- Laboratory setup (digital twin)
- Work & commissioning instructions
- Quality records

- Cable pre-assembly
- Pre-order picking
  - Ready-to-install subsystems
  - Fasteners
  - Custom packaging for installation
- Pre-assembly of large components on ready-to-install brackets
- Pre- and target configuration of the component software
- Commissioning instructions & tools
- Remote & on-site support for commissioning

- Scalable systems operation
- System expansions
- Remote systems operation
- Remote corrective maintenance
- Over-the-air updates

Smart rail solutions, delivered quickly

Colibri is a high-tech product that makes your fleet smarter with every module.

Our material kits support smart upgrades to your vehicles.

- With individual Colibri component parts assembled to meet your needs

- One-stop shop for faster and smoother processing

Advantages

- Your one-stop shop
- Fast processing
- Easy installation
- Resource-saving
- Installation by maintenance depot, mobile service or customer's own workshop

Colibri

The Colibri product & service portfolio in figures
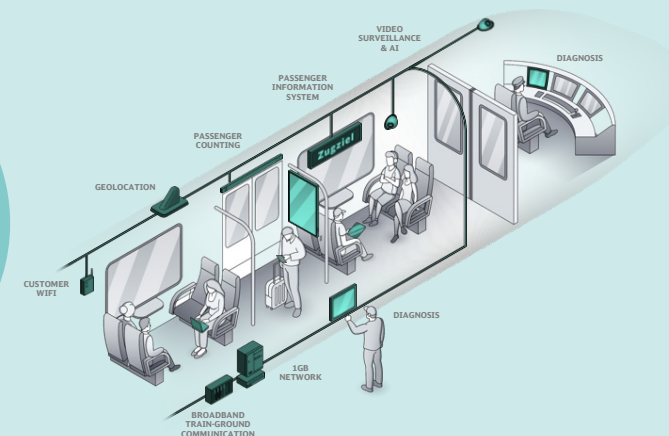

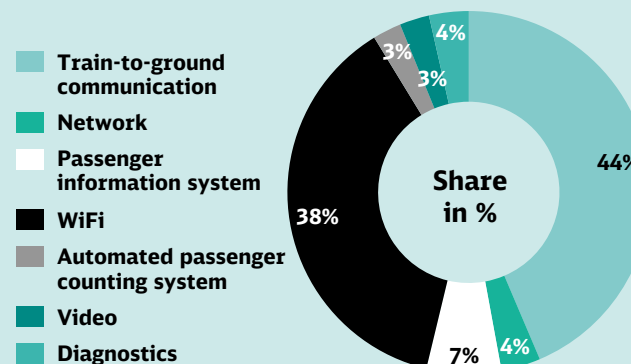

Software & service products (on the ground)

- New software development
- Project management
- Monitoring & reporting system
- SIM & traffic management
- IT-side application management (24/7 or 5/8)
- Mobile service/on-site corrective maintenance
- Remote updates

Projects in 2023
