“Pdr M” modular brake test unit

Especially for your multiple unit

- Modular design
- Expandable up to 7 modules, depending on configuration of the multiple unit
- Modules connected to one other via WiFi
- Two different control line pressures can be fed in for each module
- Battery-operated in case of mains power failure
- Up to 10 pressure measurement inputs possible
- User-guided test sequence
- Inspection sheet completed automatically upon completion of inspection
- Easy to handle when creating files for new vehicles (if test specification is stored)
- Operation via laptop
- Inspection sheet in the form of PDF and CSV file
- Test data can be used for CBM* activities
- Different languages can be selected (German, English)
 - Expandable according to customer requirements e.g. Polish, Hungarian, Italian, French, Slovenian
- Merging of inspection sheets from multiple shifts
- Pdr Modular can be combined with Pdr 7
- Integration of brake force measurement on traction units for efficiency measurement of brake calliper units

* condition-based maintenance

Master unit with laptop operation
