

Information Request

**sustainable seats
in DB rolling stock**

To make our fleet even more sustainable, we are currently carrying out a request for information on sustainable seats

Our Objectives

The results of the request for information should help us to identify innovative and sustainable approaches that can contribute to the following:

- **minimize the environmental impact and greenhouse gas emissions in our upstream value chain,**
- **increase the circularity of our fleet and**
- **assume social responsibility in the supply chain**

Target Group

All market participants along the entire seating value chain can take part in the request for information:

- **Manufacturer and reconditioner of seats and seat parts**
- **Producers and manufacturers of raw materials, materials or other seating components**

Your innovative ideas and approaches in the context of sustainability are of great importance to us in making travel with DB even more sustainable.

You can take part in the request for information by using the following link:
